

R Markdown Pre-Workshop Actions

For the R Markdown workshop on March 9 hosted by GPAC

Hey Everyone,

In order to make this workshop run smoothly, I'm asking everyone to make sure they have these installed on the computers they intend to use for the workshop. Also, if you have any problems

Download The R Language

Download RStudio

- [Download link For Mac OS X](#)
-
- Go to R Studio's website

Install the `rmarkdown` Package

To do that, copy the following code

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
